DENTE OF CONTENT DATE OSTAINED 24 REFERENCES PAGES 1 ENCLOSURES (NO. & TYPE) REMARKS RETURN TO CIA LIBRARY SX1 1. The sirfield about 1 mile west of SCHREIDERUGIL (P 54/R 94) was about 5,600x5,000 feet and hed two diagonal concrete runways, each about 5,000x65 feet. Loth runways were undamaged. On the eastern side of the field there was an oval asphalt road, about 65 feet wide, which, as was inferred from excevation work started on the southern side of the field, was to be continued to the west. The work was, however, not completed. 2. The buildings on the northern side of the field, including the hangars, were heavily damaged. 3. Although the landing field and runways were intact the field had obviously not been used since the war. 4. The installations of the SCHNEIDEREL airfield were almost completely destroyed. The field seemed to have been unused since 1945. The runways were undamaged and serviceable. SX1 Comment: The data on the condition and location of the SCHNEIDEREREL airfield confirms provious information. The destroyed field installations have not been reconstructed. No air unit is assumed to be stationed there.	TOPIC 5X1		SCENCIDELEURI. Airfield	WEST VERSION, T
